DETAILED ACTION

1. Applicant's amendment filed 2/22/05 has been received and considered.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1,3,7,8,9,10,11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,2,5,7,13,3,15 of U.S. Patent No. 6,799,753 in view of Bretaudeau et al. '498 or Japanese publication 2000-65121. Regarding the claims above applicants previous patent '753 shows a device with which applicants are well familiar. See the embodiments of figures 10+ and note the projection member at 106 and fins at 114.

'753 lacks showing a plurality of these projections.

However it is notoriously well known in the art to make singular parts plural and vice-versa as a matter of obvious engineering choice of design—or in this art—to damp vibrations in a particular frequency range or in a particular direction. Such could also be

Art Unit: 3683

the case for design limitations of the engine compartment of a particular line of vehicles which require the mount to be oriented in a particular way.

The references to Bretaudeau et al. or JP '65121 are relied upon to provide this known concept. Bretaudeau shows such projections at 19 and '121 shows them at 20.

For the reasons above it would have been obvious to have made the projection 106 of '753 as claimed in claim 1 into two halves with the dimensions and orientation as claimed, as taught by either '498 or JP '121 for the reasons above.

The rest of the claims above in the application are only an obvious variation of the corresponding claims in the patent.

Response to Arguments

4. Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection. Applicant's amendment required the new grounds of rejection. Note the added text added to claim 1 of the application and the last 4 lines of claim 1 of the patent.

Allowable Subject Matter

5. Claims 1-12 would be allowed if a terminal disclaimer is submitted as required in paragraph 2 above.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3683

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
